- the owner or authorised person of a registered plant protection product
- Scientific body planning to use a registered plant protection product for unregistered use within the framework of the project

Get a service

On-site

The use of a plant protection product registered in the Latvian Register of Plant Protection Products may be extended - the list of crops to be cultivated and the number of harmful organisms to be controlled, the dose or number of plants.

In order to be able to supplement the use of a registered plant protection product, data must be provided demonstrating that the plant protection product is safe for human and animal health and the environment and is sufficiently effective in restricting organisms harmful to plants or plant products.

Studies and experiments, or efficacy tests, are carried out in crops in order to establish its effectiveness in restricting harmful organisms before supplementing the use of a registered plant protection product. These tests must be carried out under conditions consistent with the climatic and agronomic crop cultivation conditions in practice.

In order to be able to carry out tests on registered plant protection products for unregistered use, authorisation should be granted.

Process description

Service requests

E-mail

- Customer sends documents to pasts@vaad.gov.lv or official electronic address
- documents must be signed with a secure electronic signature

Mail

- Customer sends documents by mail

In person

- customer arrives at the State Plant Protection Service and submits documents

Documents to be submitted:

- an application specifying:
 - 1) conditions for the use of a registered plant protection product for unregistered use - crop, harmful organism, dose of use, time of use, number of rounds during the season and waiting time until harvest
 - 2) the planned location of the trial
 - 3) the responsible person
- if the conditions of use of a registered plant protection product differ significantly from the conditions for unregistered use, the application shall be accompanied by a dossier containing all the necessary data to evaluate the potential effects on human and animal health and the environment.

The State Plant Protection Service shall:

- review the documents submitted;
- carry out an assessment;
- take a decision on the issue of an authorisation for the use of a registered plant protection product for unregistered use in studies and experiments.

Payment for service

The service is subject to payment of EUR 142,29 in accordance with the invoice of the State Plant Protection Service, issued on the basis of Cabinet Regulation No 493 of 12 July 2012, Schedule of State Plant Protection Service Charge Services, Annex 2, paragraph 57 (see section "Other information" - "Legislative acts").
