

Soil agrochemical research

Published: 26.04.2022.

Soil agrochemical research is a set of services provided by the State Plant Protection Service in accordance with the Cabinet of Ministers Regulation No. 833 of 5 October 2004 "[Procedures by which the Information Regarding the Fertility Level of the Agricultural Land and the Changes Thereof is Obtained and Compiled](#)".

State Plant Protection Service enters the results of the soil analysis into the Soil Agrochemical Survey Database of the State Crop Monitoring Information System and provides the person with the soil agrochemical research results.

Agronomic exploration of soils
